SUMMARY

Data Analyst skilled in Python, SQL, Excel, Power BI, and Machine Learning for analyzing data and building data-driven solutions. Experienced in data preprocessing, visualization, exploratory data analysis, and generating actionable insights to support business decision-making.

TECHNICAL SKILLS:

- **Programming Languages:** Python, SQL
 - **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Microsoft Excel
 - **Databases:** MySQL, PostgreSQL
 - **Machine Learning & AI:** Scikit-learn, Regression, Classification, Model Evaluation, Data Preprocessing
 - **Tools & Platforms:** Jupyter Notebook, Google Colab, Anaconda, Git, GitHub, Visual Studio Code
-

WORK EXPERIENCE

Freelance Data Analyst | Self-Employed | 2025 – Present

- Delivered data analysis and machine learning solutions using Python, SQL, Pandas, NumPy, and Scikit-learn for real-world datasets.
- Performed data cleaning, preprocessing, exploratory data analysis, visualization, and model development to generate actionable business insights.

DELTRON | Data Analyst Intern | 9 Months

- Analyzed structured datasets using Python, SQL, Excel, and Power BI to identify trends and support business decisions.
 - Performed data cleaning, preprocessing, dashboard creation, and reporting to improve data accuracy and operational efficiency.
-

PROJECTS

Film Suggestion Engine | Machine Learning Project | [Link](#)

- Developed a content-based recommendation system using Python, Pandas, NumPy, and Scikit-learn to suggest films based on genres, keywords, cast, and crew data.
- Performed data preprocessing, feature engineering, NLP techniques, text vectorization, and applied cosine similarity to generate accurate movie recommendations.

Customer Churn Analysis | Data Analysis Project | [Link](#)

- Analyzed customer data using Python, Pandas, NumPy, and SQL to identify key factors contributing to customer churn and retention.
- Performed data cleaning, exploratory data analysis, and created visualizations using Matplotlib, Seaborn, and Power BI to generate actionable business insights.

HR Analytics Dashboard | Power BI Project | [Link](#)

- Analyzed HR data using Power BI to identify employee attrition trends, workforce distribution, and department-wise performance metrics.
 - Created interactive dashboards, KPI visualizations, and reports to generate actionable insights and support HR decision-making.
-

EDUCATION

Manav Rachna International Institute of Research and Studies | 2022-2024

Master of Computer Application
