CHANDAN MISHRA

Data Scientist | Machine Learning Engineer | Data Analyst

Dwarka, New Delhi, India | +91 85279 35646 | chandankmishra567@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Science and Machine Learning professional with 2+ years of experience in data analysis, predictive modeling, NLP, and model deployment. Skilled in building end-to-end machine learning solutions with Python, SQL, Scikit-learn, and Flask, and in turning raw data into actionable insights through Power BI dashboards and statistical analysis. Experienced in deploying models on AWS and Docker, and working with Deep Learning, Generative AI, and Large Language Models (LLMs). Seeking a Data Scientist / Machine Learning Engineer role to deliver data-driven business impact.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Data Analysis and Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Microsoft Excel, Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Data Preprocessing, Cross-Validation, GridSearchCV, Hyperparameter Tuning, Model Evaluation, Machine Learning Pipelines
- **Natural Language Processing (NLP):** Text Preprocessing, Tokenization, Stopword Removal, Bag of Words, CountVectorizer, TF-IDF, Text Classification, Emotion Classification, NLTK
- **Deep Learning and Generative AI:** Deep Learning Fundamentals, Neural Networks, Generative AI, Large Language Models (LLMs), Prompt Engineering
- **Databases:** MySQL, PostgreSQL
- **Cloud and DevOps:** AWS (EC2, S3, IAM, Cognito, CodeBuild, CodeArtifact), Docker, CI/CD, Git
- **Model Deployment and Web:** Flask, REST APIs, Machine Learning Model Deployment
- **Tools:** GitHub, Jupyter Notebook, Visual Studio Code, Anaconda

PROFESSIONAL EXPERIENCE

Data Science and Machine Learning Engineer | Drytis Inc. | Jun 2025 - Present

Tech Stack: Python, SQL, Pandas, NumPy, Scikit-learn, Flask, Power BI, Excel, AWS, Docker, Git

- Cleaned, preprocessed, and engineered features from large datasets using Python, Pandas, and NumPy to prepare high-quality inputs for modeling
- Built and evaluated classification, regression, and predictive analytics models using Scikit-learn
- Applied NLP techniques including text preprocessing, TF-IDF vectorization, and text classification to extract insights from unstructured data
- Improved model performance through cross-validation, hyperparameter tuning, and systematic model evaluation
- Deployed machine learning models as Flask-based applications and REST APIs using Docker and AWS services
- Explored Deep Learning, Generative AI, LLMs, and prompt engineering for AI-powered applications
- Created data visualizations and analytical reports to communicate insights and support data-driven decision-making

Data Analyst Intern | BeGrids Technologies | Nov 2024 - Apr 2025

Tech Stack: Python, SQL, Excel, Power BI, Pandas, NumPy, MySQL

- Analyzed, cleaned, and transformed datasets using Python, SQL, and Excel to generate actionable business insights
- Developed interactive Power BI dashboards and automated Excel reports for performance tracking and data visualization
- Performed data preprocessing, exploratory data analysis (EDA), and statistical analysis to support business decisions
- Wrote and optimized SQL queries for data extraction, transformation, and reporting
- Collaborated with cross-functional teams to deliver data-driven solutions and improve reporting workflows
- Contributed to sales analysis, customer insights, and business intelligence reporting projects

Data Analyst Intern | Deltron Technologies | Mar 2023 - Jun 2023

Tech Stack: Python, SQL, Excel, Pandas, NumPy, Power BI, MySQL

- Processed and analyzed datasets using Python, SQL, and Excel to generate business insights
- Performed data preprocessing, EDA, and data visualization to identify trends and patterns
- Built Power BI dashboards and Excel reports to support data-driven decision-making
- Wrote SQL queries for data extraction, transformation, and reporting from relational databases
- Supported analytics projects covering sales analysis, performance tracking, and business reporting

PROJECTS

Sentiment and Emotion Analysis | NLP and Deep Learning

Technologies: Python, Pandas, Scikit-learn, TF-IDF

- Built an NLP text classification model to identify emotions such as joy, sadness, anger, fear, love, and surprise
- Applied text preprocessing and TF-IDF vectorization to convert raw text into numerical features
- Trained and compared Multinomial Naive Bayes, Logistic Regression, and SVM models using accuracy, precision, recall, F1-score, and classification reports

House Price Prediction | Machine Learning and Regression

Technologies: Python, Pandas, NumPy, Scikit-learn, Flask, Jupyter Notebook

- Built a regression model to predict house prices using Python and Scikit-learn
- Performed data preprocessing, EDA, and feature engineering; evaluated the model using MAE, RMSE, and R^2 score
- Developed and deployed a Flask web application for real-time house price predictions

Movie Recommendation System | NLP and Machine Learning

Technologies: Python, NLP, NLTK, Scikit-learn, Pandas, Flask

- Developed a content-based recommendation system using NLP and machine learning techniques
- Implemented text preprocessing, CountVectorizer, stemming, and cosine similarity to generate relevant movie recommendations
- Created a Flask web application for interactive movie search and recommendation

Sales Data Analysis | Data Analytics and Business Intelligence

Technologies: Python, SQL, Pandas, NumPy, Power BI, Matplotlib, Excel

- Analyzed sales datasets to uncover business trends, customer insights, and revenue patterns using Python and SQL
- Performed data cleaning, transformation, EDA, and statistical analysis with Pandas and NumPy
- Created interactive Power BI dashboards to track key performance indicators (KPIs)

EDUCATION

Master of Computer Applications (MCA) | Manav Rachna International Institute of Research and Studies | 2022 - 2024 | CGPA: 7.64
